

ACM Epoxy Dustproofer/Sealer

Old or new concrete can be a source of dust, which is unacceptable in many manufacturing and warehouse environments. **ACM Epoxy Dustproofer/Sealer** provides an economical and effective answer to this problem, providing a durable finish that is attractive and readily cleaned. **ACM Epoxy Dustproofer/Sealer** is solvent free, low odour and non-tainting allowing use in food production areas, electronics factories, warehouses, engineering premises, manufacturing plants and many more.

ADVANTAGES

ACM Epoxy Dustproofer/Sealer is a hard wearing, hygienic, attractive, solvent free, economical, low odour water dispersed epoxy floor coating. Adhesion is good to most clean and dry substrates. Wear resistance is excellent. Chemical resistance is good. Also useful as a priming coat under **ACM Epoxicote**. **ACM Epoxy Dustproofer/Sealer** generally has a sheen finish. A matt version is available at extra cost.

SURFACE PREPARATION

Subfloor preparation is of key importance with products of this nature. The surface should be free of oil and grease. Weak material or laitence should be removed prior to application of the product. Highly polished surfaces e.g. powerfloated concrete, marble and terrazzo tiles should be mechanically textured. The floor should then be either vacuumed or swept clean. Sound, stable floor construction is essential.

APPLICATION PROCEDURE

Stir the contents of both components tins and thoroughly mix together. Drill spinners/paddles, spatulas or other square-edged implements are recommended for mixing. When mixed, do not leave in tin as flash set may occur. Spread onto floor or apply from tray/scuttle (available from **ACM**). Long pile (sheepskin type) rollers recommended (also available from **ACM**).

PACK SIZE/ COVERAGE

4.5L packs, coverage approx. 30sq.m. A single coat often suffices but a two coat application provides the best resistance.

CURING

Within 24 hours at normal temperature.

COLOURS AVAILABLE

Light grey, mid grey, dark grey, tile red, mid blue, sea blue, mid green, buff, safety yellow, black, white and clear.

HEALTH AND SAFETY

Information supplied upon request.

CONTRACT APPLICATION

A network of approved independent installers is established for contract application. Please contact **ACM** for details.

TECHNICAL SERVICE

A full application and advisory service is available.

IMPORTANT: Splitting packs for economy reasons is risky and could lead to failure to set.
